

SAMPLE REPORTS

Here are two sample reports from our service, 100 Global Mining Projects.

We cover projects from the pre-feasibility stage through to early construction. Our reports advise you on the scope and timing of projects and the key companies and people involved in them. Our aim: to assist mining-service companies in their international expansion.

TULU KAPI 360 kilometres west of Addis Ababa, Oromia region, Ethiopia, gold, US\$270 million, Advanced Planning

Mining will be open-cut, with the possibility of future underground mining. Processing will include crushing, grinding and carbon-in-leach treatment, to produce gold doré. The annual capacity of the plant will be approximately 2 million tonnes. Annual gold production will be 140,000 ounces, for at least seven years.

Earthworks are underway. A community resettlement program is expected to commence in Q2 2019. Subject to the completion of this, construction is planned to commence in Q4 2019, following the end of the wet season (June-September), with first production in 2021.

Proponent: Tulu Kapi Gold Mines (TKGM), comprising Kefi Minerals (Ethiopia) Limited and Ethiopian government and private-sector organisations

Operator: Kefi Minerals (Ethiopia) Limited, Daminaroff Building, PO Box 57100, Addis Ababa, Ethiopia, +251 11647 9976/73, info@kefi-minerals.com

Mr Wayne Nicoletto, Managing Director

Mr David Munro, Head of Operations

Mr Kebebe Melete, Country Manager Ethiopia

Contractor – processing plant (South Africa): Lycopodium ADP (Pty) Limited, West Block, Business Connection Building, Century Boulevard, Cape Town, 7441, South Africa, +27 21 521 9400, info@lycopodiumadp.co.za

Mr Steve Burks, Managing Director

Mr Albert Jacobs, Manager of Engineering

Mr Wayne Gorton, Contracts and Procurement Lead

Contractor – processing plant (Australia): Lycopodium Limited, 1 Adelaide Terrace, East Perth, WA 6004, Australia, +61 8 6210 5222

Mr Bruno Ruggiero, Technical Director, bruno.ruggiero@lycopodium.com.au

Contractor – mining: Ausdrill Limited, 612 Upsala Place, Canning Vale, WA 6155, Australia, +618 9311 5666, info@ausdrill.com.au, enquiries@amsgh.com

Mr John Kavanagh, Chief Operating Officer Africa

Mr Darren Wheadon, General Manager, African Mining Services (a subsidiary of Ausdrill)

Mr Anthony Goddard, Sourcing Manager

Note: the operator is a subsidiary of Kefi Minerals plc.

BATU HIJAU Sumbawa Island, Indonesia, copper-gold, Early Planning

Expansion of the Batu Hijah copper-gold mine. Currently, mining is open cut, while processing includes crushing, grinding and flotation, to produce a copper-gold concentrate. Two expansion prospects are under consideration:

- development of the Elang deposit, 60 kilometres east of the mine and one of the world's largest undeveloped copper-gold deposits
- the addition of a smelter to the processing circuit

The proposed smelter development is in line with Indonesian government policy of seeing the processing of locally-produced minerals increased.

Studies are being undertaken of both these prospects. The timing of further developments is yet to be determined.

Operator - Jakarta: PT Amman Mineral Nusa Tenggara, Energy Building, SCDB Lot 11A, Jalan Jend. Sudirman Kav. 52-53 Kebayoran Baru, Jakarta 12190, Indonesia, +62 21 5799 4600
Mr Chee Tan, Senior Manager Projects and Development
Mr Shane Bennett, Study Manager Elang

Operator – Sumbawa: PT Aman Mineral Nusa Tenggara, West Sumbawa Regency, West Nusa Tenggara, Indonesia, +62 372 635318
Mr Wayne Perry, Project Director
Mr Hamid Arif, Procurement and Contract

Contractor – Batu Hijau: PT Macmahon Mining Services, Energy Building, SCDB Lot 11A, Jalan Jend. Sudirman Kav. 52-53 Kebayoran Baru, Jakarta 12190, Indonesia, +62 21 7883 8999
Mr Tim Nolan, Project Director, Batu Hijau

Note: PT Amman Mineral Nusa Tenggara has a 44% shareholding in Macmahon Holdings, an Australian-listed company that owns PT Macmahon Mining Services, the Batu Hijau contractor.
